"A very generous book ... the best of classical children's literature lies under the storylines along with witty satires that appeal to children as well as adults." Dov Elbaum, *Yediot Ahronot*

Higher and Higher

Yuval Elazary & Lital Amir

English translation available.

"Earth", "country", "world" and "location" can be confusing notions for children to understand. **Higher and Higher** introduces all these terms and more, in an interactive new way.

It explains through words and illustrations how planet Earth looks from above, how maps are drawn and read, and where we stand in the whole universe.

Yuval Elazary is an author and a non-fiction editor. Lital Amir studied graphic design and just graduated with honours.

"[...] accessible and simple writing filled with humour and love that will open the curiosity to learn in every child." Atara Ofek, Marmelada
